SHAHROZ KHALID

WORK EXPERIENCE

Professional Summary

I'm a React Native Developer with 2.6+ years of expertise, seeking a dynamic work environment that chances professional growth and values dedication to quality work. I building high-performance mobile applications with seamless user experiences. Excited to work on creative projects and improve my skills through teamwork.

React Native Developer

Devgate Consultancy, Islamabad
Aug-2023 - Present

- Develop mobile applications using React Native
- Contribute old code and improving functionality.
- Build reusable components & Custom Hooks.

Xpertspot Systems, Rahim Yar Khan
Jun-2022 - Jul-2023

- Develop mobile applications using React Native
- Updated old code bases to modern development standards, and improving functionality.
- Experience with Redux, Redux toolkit, RTK query.
- Build reusable components & Custom Hooks

Lime Technologies, Rahim Yar Khan
Oct 2022 - Dec 2022

- Develop mobile applications using React Native
- Leverage native APIs integration
- Build reusable components.
- Collaborate with the team

Syntax House, Rahim Yar Khan
Jan-2022 - Mar-2022

- Responsive Ui Design
- Performance Optimization
- Cleaning Code, enhancing readability
- Lottie Animations

SKILLS

- React Native
- ReactJS
- NodeJS
- Express
- Mongodb
- Redux
- Rest API
- JavaScript
- TypeScript
- Database (SQL / Firebase)
- HTML
- CSS
- Bootstrap
- Figma
- GitHub
- Problem Solving Skills
- Team Lead
- Team Player

- Develop mobile applications using React Native
- Experience with Redux, Redux toolkit, RTK query.
- Build reusable components

EDUCATION

Bachelor of Science in Computer Science (BSCS)
Khwaja Fareed University (KFUEIT)
2019-2023

Intermediate in Pre-Engineering
Punjab Collage Rahim yar khan
2018-2019

CERTIFICATES

JavaScript
Meta (coursera)

React Native
Meta (coursera)

React Basics
Meta (coursera)

Back-End Apps with Node.js and Express
IBM (coursera)

PROJECTS EXPERIENCE

1) Albredy User App

Developed a pet-centric mobile app with React Native and Redux Toolkit, featuring smooth cart management and intuitive card functionality for browsing and selecting pet supplies. Integrated APIs for real-time updates, ensuring up-to-date and relevant product data for pet owners.

2) Albredy Rider App

Developed a React Native Rider App with Google Maps integration, enabling real-time location tracking, distance calculation, and ETA. Integrated APIs to facilitate seamless updates of delivery status by both users and riders.

3) ProAssetz App

Built a trading app, ProAssetz, with full UI and functionality using Redux for state management, API integration for real-time data, Context API for shared state, and core JavaScript concepts and functions.

4) ECleaner App

Developed the ECleaner app, facilitating buying and selling of recyclable items. Implemented SQLite to create, update, and delete functionality for both user and admin sides, ensuring efficient management of recyclable item listings.

5) Hazrixpert App

Developed school management app, Hazrixpert, allowing parents and students to conveniently access attendance records, exam papers, marks, datesheets, and holiday information for a comprehensive overview of their academic activities.

6) TaxCount App

Developed TaxCount, a comprehensive tax calculation and pay tax, leveraging Redux for state management, API integration using RTK Query, and dynamic form generation for seamless user experience. Implemented advanced functionalities to handle various tax-related tasks and ensure efficient tax management.

7) STCharger App

Created STCharger, a user-friendly app for electric vehicle charging. Integrated APIs and Google Maps to display charging stations and providers. Users can register their charging services, while customers can easily locate and utilize available charging points on the map.

8) NAVPAL App

Developed NAVPAL, a multi-functional app that enables users to find nearby hotels, check real-time traffic conditions for congestion-free routes, explore popular places of interest, and create personalized itineraries for scheduled visits. Packed with various features, NAVPAL offers a comprehensive navigation and travel companion experience.

9) ADDICT App

Created ADDICT, a movie app with a diverse selection of paid and free videos. Utilized multiple subscription packages to cater to user preferences, enhancing the viewing experience. Users can access a vast collection of tailored movies and videos based on their subscription level.

10) Sea Food App

Developed a Sea Food App for restaurant food ordering. Integrated APIs to showcase a variety of seafood items and implemented Redux for seamless cart functionality, allowing users to easily add and manage their food orders.

11) QPON App

Built QPON, a user-friendly app for creating and managing product ads. Designed a clean and intuitive UI, utilizing reusable components and following best coding practices. Users can seamlessly buy or sell products, leveraging the app's efficient and well-structured codebase.

12) UNICHARGE App

Created UNICHARGE, an efficient and user-friendly electric car charging app with clean code and reusable components for seamless navigation and enhanced user experience.

13) Text Scanner App

Developed a Text Scanner app with image recognition capabilities, allowing users to extract text from images captured through the camera or selected from the device's gallery.

14) BASIT App

Built BASIT, a user-friendly shopping app focused on clothing, enabling users to buy and sell a variety of clothes. Users can list their items for sale and browse through a wide range of clothing options to make purchases.

15) SmartEdu App

Created SmartEdu, an educational app offering a diverse range of courses with access to online video content. Users can explore various subjects and enhance their knowledge through interactive video lessons and educational resources.

16) TODO App

The TODO app is built with Redux Toolkit and allows users to create, update, and delete tasks. All task data is stored in the local storage of the user's device, enabling them to access their tasks offline.

17) LocaShare App

LocaShare is a mobile app developed to allow users to share their live location with their friends and family. The app also allows users to save their favorite locationsFirestore is used in the LocaShare app to enable real-time location tracking and data storage/retrieval.

18) SpaceHub App

Contributed to SpaceHub platform development, integrating REST API and npm packages for efficient workspace booking and also maintaining and optimizing the codebase.

19) Pencil News App

Developed a news app called Pencil, built with Redux Toolkit. The app scrapes news articles from various websites, allowing users to explore a wide range of topics on a single platform.
